

A FEW FACTS!

Longfellow could take a worthless sheet of paper, write a poem on it and make it worth \$5,000.

J. P. Morgan can write a few words on a piece of paper and make it worth \$1,000,000.

A mechanic can take a pound of steel and work it into watch springs, and make it worth \$800.

We can write a check for \$1,000,000 and it would not be worth a dime.

Your wife can buy a coat worth \$10 but prefers one that cost \$50.

There may be merchants who will tell you that they have better stock than we have.

We have a good stock of all kinds of Lumber that we are willing to sell at a reasonable profit.

SEE THEIR BUGGIES.—J. S. Wilson & Bro. pride themselves on pleasing their customers and holding their trade. The reason they go back is easily explained—they sell the best vehicles that can be sold for the money. Go and look at their buggies—a big lot just in.

TO REPRESENT KENTUCKY.—Governor Beckham has designated Colonel R. D. Williams and Colonel J. R. Allen, of Lexington to represent Kentucky as aides on General Corbin's staff at the great military pageant that is to be one of the features of the exercises at the dedication of the St. Louis Exposition on April 30.

WONDERFUL PROGRESS

Status of Development of Great-est of Expositions.

WORLD'S FAIR GROUNDS AT ST. LOUIS

How Another "City of White" is Rising in Its Wealth and Splendor to Attract Millions of Visitors. Mammoth Palaces For the Exhibits.

It's a good afternoon's work to make even a cursory survey of the World's Fair grounds at St. Louis. What one may see is the mere exterior of a vast exposition. It has taken a deal of energy and thoughtful planning to get the great project under way.

One who is far from the scene of this great work has little thought of the tremendous tasks of grading and underground work. There must be water pipes to every part of the grounds, both for daily use and for emergency in case of fire. There must be conduits for the hundreds of miles of electric wires used both for telegraph and telephone service. There

LIBERAL ARTS BUILDING. must be many miles of drains and sewers in order that the highest condition of sanitation may be obtained. But this work has nearly all been done.

The system of railway tracks, too, reaching the site of every big building, is no small problem in engineering. The grounds are approximately one mile wide by two miles long, containing 1,180 acres. The number of large exhibit buildings is 15, containing from 4,000,000 to 12,000,000 feet of lumber each and hundreds of tons of plaster, to say nothing of the thousands of pounds of steel, iron, bolts, nails, glass and other materials. The thousands of carloads of materials of every kind must be brought in when wanted, so that the railway business of an exposition is one of its most important details.

Eleven of the large exhibit buildings are under contract or finished. The Palace of Education is done. In it Kentucky will make a display covering 2,500 square feet. The Palaces of Electricity and Varied Industries are

ELECTRICITY BUILDING. practically completed. The other palaces under construction are the manufacturers, machinery, art, liberal arts, agriculture, transportation, mines and metallurgy, and the United States Government building. The contracts for other buildings will be let within a short time.

Throughout these vast grounds one finds the greatest activity. The heavy task of grading for the foundations of the \$1,000,000 group of art palaces was one of the important contracts. These three great palaces, counted as one in eleven, stand upon an eminence 60 feet above the general level of the main group of buildings. Including the court, they occupy more than eight acres. The northern front of the three buildings is 828 feet. The central building, which is of permanent, fire-proof construction, has a frontage of 348 feet and a depth of 166 feet. The two side buildings are 200 by 422 feet.

Another grading contract of stupendous proportions was that which preceded the construction of the Hall of Agriculture. This great building, like the Palace of Art, is on high

TRANSPORTATION BUILDING. ground. It will stand well apart from the "main picture," as the principal group of the buildings is called. Its vast dimensions entitle it to more than ordinary consideration, hence the favorable and commanding site. It will cover more than 18 acres. Expressed in feet, the Hall of Agriculture is 500 by 1,600, the distance around it being nearly four-fifths of a mile. The exterior walls are to be 50 feet high, and the design will be accentuated with towers and other features.

Directly south of the Hall of Agriculture will stand the Horticulture building, 400 by 800 feet. Gardens and terraces made beautiful in every way known to the art of the landscape architect will surround both these great buildings, the entire area devoted to these two departments being 67 acres.

Kentucky exhibits will occupy 12,000 square feet of space in the Agricultural building and 3,000 square feet in the Horticultural building.

Besides the greater exhibit palaces will be hundreds of state and foreign buildings and the smaller structures for many purposes. Thousands of men will be employed the season through, and all will be in readiness well in advance of the opening day next year.

ROAD AND FARM IMPROVEMENT

POISON DISTRIBUTOR.

The Invention of a Texas Man Who Believes in Wholesale Fighting of Insects.

It is a comparatively simple task to apply insect exterminators to a small patch of potatoes or other growing vegetables, but when the work must be done on a large scale to protect a field covering acres of ground the cost of the operation often absorbs the profit of the crop. The introduction of machinery for agricultural work has considerably reduced the expense of planting and harvesting the enormous crops raised

POISON DISTRIBUTOR.

on some farms, by doing away with hand labor, and it is the intention of Edward Zedlitz, of Paige, Tex., to also reduce the cost of destroying the insects which infest growing plants by the use of his new poison distributor. In the drawing the machine is shown in operation, with one plant bent forward to permit a discharge of the powder to the under surface of the leaves. The machine has a faculty of applying the poison in the form of either a liquid or powder, and the spraying nozzles and bender can be adjusted to treat plants of different heights. The reservoir for containing the poison is sealed after the powder or liquid has been placed inside, and an air compressor geared to one of the wheels forces air into the reservoir and out through the spraying nozzles. If a powder is used the movement of the air inside the chamber sets the dust aloft and blows it out through the pipes, while a liquid can be driven out by compression. A safety valve is provided to reduce the force should the air pressure inside the chamber become too high or the compressor may be disconnected for a time.—Louisville Courier-Journal.

ROADS AND SCHOOLS.

Improved Country Highways Mean Better Education for the Farmer's Boys and Girls.

One of the most beneficial results of road improvement is the facility it gives to consolidate country schools and thus concentrate our children into central buildings, so making graded schools possible in our country districts. In traveling around the state we have noticed that where improved roads exist the children, by means of bicycles, easily go long distances to central schools; thus graded roads make possible graded schools, the improved roads working in harmony with the state education law, giving the children of the rural districts the same advantages as those residing in cities. In one year 44 Connecticut towns, by means of improved roads, were enabled to give free transportation to a large number of their pupils. Forty-four small schools were closed and 849 children rode to the central schools. The cost of transportation was about \$12,000, but a gross amount of some \$20,000 was saved, leaving a net saving of some \$8,000. This saving was only a small part of the benefit derived, for it resulted in a better attendance and better schools. This close coordination between improved roads and education cannot be too strongly impressed upon the public attention.—N. Y. Tribune-Farmer.

The Return of the Birds.

The farmers' friends, the birds, will soon be here to renew their labors of home life and love, and at the same time help in the destruction of insects, and later on weed seeds. That farmer who does not permit them or their nests to be disturbed, and whose farm is not too finely cleared, is apt to possess the advantage of having the greater number. A tangled thicket in a fence corner, an old choke or wild cherry tree, bushes that bear wild berries, will make the farm attractive to them. It would seem that most bird houses are placed too near the house for the wilder birds to occupy, but if they were nailed up here and there in the orchards or fields, they would soon be tenanted by these little workers in the farmers' interest.—Farm Journal.

Red Clover Is Invaluable.

Red clover is valuable for the abundance of pasture it produces and for its nitrogen, as well as containing a large proportion of starchy matter, it is one of the best balanced foods used, and is also highly relished by all kinds of stock. In addition to promoting a large flow of milk from cows, it is unexcelled as pasture for hogs. Its value as a fertilizer is also admitted, and many farmers grow it for that purpose as well as for food.

FREE TRIPS TO ST. LOUIS FOR ALL EXPENSES OF THE 120 MOST POPULAR SCHOOL TEACHERS IN THE STATE PAID.

School children and public generally invited to vote to determine the most popular teacher in every county. Votes to be cast each, ten cents at one time. All money over and above trip expenses of teachers to go into erection of the Kentucky Building at the Exposition. Every voter thus given the satisfaction of knowing a worthy cause and important object have been aided, at the same time a favorite teacher has received recognition. Contest conducted under auspices of Educational Exhibit Committee of Kentucky Exhibit Association, on the organization formed to raise \$100,000 for a Kentucky Building and full display of the state's products and resources at the Fair, the Legislature having passed an appropriation. Every educator in the State, whether teacher in public or private school, or member of faculty of academy, college or university, medical, dental or theological institution, protestant or catholic denominational school, is eligible to election. Members of the Educational Exhibit Committee alone excepted.

Names of all school children voting to be enrolled in the Kentucky Building at the Exposition. Kentucky will have an educational exhibit occupying 2,500 square feet of space in the Palace of Education. The Exposition is to be the greatest international event in the world's history. The 120 teachers chosen will be lucky indeed in being tendered this trip to the Fair. Every county elects its own most popular educator. The county outside of Jefferson casting the largest number of votes will be allowed to send two teachers—the most popular and the second most popular.

THE VOTES WILL BE TEN CENTS EACH, TEN CONSTITUTING A BALLOT.

Attention each every school child in the State will be able to cast at least one vote for his or her favorite teacher. But the voting will not be confined to school children.

PARENTS OF PUPILS OR ANY OF THEIR FRIENDS MAY VOTE. The purpose of the Association being to elect the most popular school teacher in each county, so considered by the public generally, as well as by the school children. Votes contain ten spaces, so that of ten pupils may be arranged and each giving ten cents be credited with his or her vote. If one person desires to cast ten votes, it may be done by writing his or her name on one of the spaces and remitting one dollar. It is not required that the name of the person voting be given at all. All of the spaces for voters' names may be left blank. The Association wants, however, to enroll in the Kentucky Building at St. Louis next year the name of every child who cast one or more votes in the contest. Pupils are asked therefore to sign their names plainly to the ballots.

ALL EXPENSES OF THE TEACHERS WILL BE PAID BY THE ASSOCIATION. This will include railroad transportation from Louisville to St. Louis and return, board at one of the best hotels in the city for six days and admission to the exposition grounds for six days.

THREE PARTIES WILL BE MADE UP FROM THE MOST POPULAR TEACHERS to make the trip most profitable and more enjoyable. Each of these parties will consist of forty (40) teachers. This would make a total of 120 teachers, but as there are only 119 counties in Kentucky, the Association has decided to allow two teachers—the most popular and the second most popular—to go from that county—Jefferson excepted—which casts the greatest number of votes in the contest. ALL TEACHERS IN THE STATE STAND ON AN EQUAL FOOTING in this contest. The teacher with only twenty pupils may receive more votes than the teacher with five or six times as many enrolled in his or her school, because the voting is not confined to children. The public will be an important factor.

Votes may be cast for any person who taught school during 1902 or is teaching now. This gives the teacher of a five months' school, which closed in November or December, the opportunity to be voted for during the vacation period.

ANY NUMBER OF BALLOTS MAY BE CAST AT ONE TIME. There is no limit. The more dollars sent in for any one teacher the more votes he or she will be credited with.

ONE DOLLAR CASTS TEN VOTES; TWO DOLLARS CASTS TWENTY VOTES; THREE DOLLARS CASTS THIRTY VOTES; FOUR DOLLARS CASTS FORTY VOTES; FIVE DOLLARS CASTS FIFTY VOTES; TEN DOLLARS CASTS A HUNDRED VOTES; ONE HUNDRED DOLLARS CASTS ONE THOUSAND VOTES.

All of the money received in this contest, over and above that used in defraying expenses of the 120 most popular teachers of the State on their trips to the World's Fair, will go for the erection of a Kentucky Building at the exposition; so every voter in this contest may have the additional satisfaction of knowing that he has added a worthy cause.

THE STANDING OF THE CONTENTANTS WILL BE PRINTED FREQUENTLY in each county to show his or her friends how the race is going. Begin voting now for your favorite school teacher. The votes will be counted under the supervision of the Educational Exhibit Committee of the Association. The personnel of this committee is as follows: Prof. L. G. Brownell, Louisville, Chairman; Prof. H. W. McCleskey, Frankfort; Prof. R. E. Jelliffe, Louisville; Prof. W. H. Bartholomew, Louisville; Prof. F. Paul Anderson, Lexington; Dr. Chase Palmer, Danville; President William Dinwiddie, Jackson; Dr. W. G. Frost, Berea; Dr. B. B. Hunt, Louisville; Dr. R. E. Mullins, Louisville; Dr. Arthur Yager, Georgetown; Superintendent M. A. Cassidy, Lexington; Superintendent S. L. Froge, Frankfort; Prof. C. J. Crabbe, Ashland; Prof. McHenry Rhoads, Owensboro; Prof. T. S. Allen, Bellevue; Prof. C. C. Cherry, Bowling Green; Prof. E. H. Spencer, Louisville; Miss Pattie S. Hill, Louisville; Mrs. Emily H. Bracken, Louisville; and Mrs. M. B. Tucker, Louisville. Members of the Educational Committee are not eligible to election in this contest.

REMEMBER EVERY COUNTY ELECTS ITS OWN FAVORITE TEACHER. Competition between counties only applies to the race for the 120th trip, the county outside of Jefferson, casting the largest total number of votes being granted the distinction of sending two teachers. The result will be announced in every paper in the state, and, in addition to this, a congratulatory message will go to the teacher elected in each county. Later the details of the trip will be arranged, each teacher chosen being given the privilege of selecting the month—June, July or August, 1903—in which he or she wants to make the trip.

CLIP OUT THIS BALLOT, FILL UP BLANKS AND MAIL WITH \$1.

cast TEN votes for _____ 9-A

of _____ as the most popular teacher in _____

_____ ONE DOLLAR ENCLOSED.

10c. _____ 10c.

10c. _____ 10c.

10c. _____ 10c.

10c. _____ 10c.

10c. _____ 10c.

Voters are not required to sign their names, but the Association wants all school children voting to do so, as it will enroll them in the Kentucky Building.

Remittances may be made by certified check, registered letter, 1 cent postage, express or postal money order, or in currency at sender's risk. Address all communications to R. E. HUGHES, Secretary, Louisville, Ky.

Notice to the Public.

I am now prepared to do all kinds of Plumbing and Gas Fitting, Tapping Sewers, &c., in fact I can do anything in the Plumbing line. If you are contemplating fixing up a bath room or closet or stationary wash stand, get an estimate from me. I am located on Seventh street, between Main and High. Phone 276.

W. C. WILLETT.
